Grading Rubric: Every submitted manuscript will be evaluated and ranked based on the following:

Scale based on quality (poor) (Low- (poor) (Low- (poor) (Low- (low- (low- average) (Good) (Excellent) (Excellent)  1. Is the topic relevant to the field of this journal?  2. Does this manuscript make a significant contribution to the field?  3. Is the manuscript methodologically sound?  4. Are the methods and data statistical analysis clearly described?  5. How about the overall study/case design?  6. Do the findings answer the research questions?  7. Are the manuscript's conclusions sufficiently supported by the presented case or obtained results?  8. Are the figures and tables well presented and easy to read and understand?  9. Is the English language use correctly?  10. Are the references up to date and appropriate?  11. Is the discussion and literature review insightful and informative?  12. Is the overall manuscript well organized, well written?  13. Is there an IRB approval?	following:
